

MAHIRUL ALAM CHOWDHURY

SQA ENGINEER

Phone: +8108095852178, +8801709251456

Address: Asakashi, Saitama, Japan

Email: chymahirul13@gmail.com

Portfolio: <https://github.com/Slyyoursenpai>

PROFESSIONAL SUMMARY

Hard-working, eager, and quick learning SQA Engineer with 1.5 years of experience in web, API testing, hardware testing, and test automation. Seeking a full-time position to contribute to delivering world-class products and expand my skill set for greater impact in collaborative engineering teams

WORK EXPERIENCE

Jr. SQA Engineer | 2025-2026

MarginEdge (via Tekarsh)

- Performed API and manual testing, requirement analysis, test case design, and design for the MarginEdge web application and Freepour hardware, ensuring 95% feature stability for each release
- Identified, documented, and tracked 200 bugs using Jira over 14 months, including critical defects and requirement inconsistencies, reducing user reported bugs by 25%
- Conducted regression, smoke, API, and functional testing, directly supporting the successful release of 7 new product features and upgrades collaborating with development teams, product managers, and cross-functional teams
- Adopted Test Driven Development approach, resulting in fewer bugs, faster deployment and a 45% improvement in task completion rate across the team

QA Automation Engineer Intern | 2024-2024

A1qa

- Developed and maintained 10+ automated test suites for Wikipedia, AccuWeather, and GeeksforGeeks using Java Selenium and Cucumber BDD, reducing manual testing effort by 65%
- Implemented Page Object Model design pattern across 5 test suites, improving code reusability by 40% and reducing maintenance time by 3 hours per sprint
- Streamlined CI/CD pipeline integration with Jenkins and Docker, achieving 80% automated test execution consistency and reducing deployment cycle time from 4 hours to 45 minutes

ACADEMIC HISTORY

North South University | 2020-2024

Bachelor's of Computer Science and Engineering

- GPA: 3.58
- Cum Laude Distinction
- Recognition for research publication on Machine Learning enabled healthcare

PROJECTS & PUBLICATIONS

WordPress Dark Mode Plugin Automation | Java, Selenium, POM

Developed an end-to-end automation test suite for the WP Dark Mode plugin using Java and Selenium, covering functional and regression scenarios.

Wikipedia-Automation-with-POM-and-Aquality | Java, Aquality Selenium, POM

Built an automated test suite for Wikipedia using Aquality Selenium (Java) and Page Object Model (POM), improving test script reusability and maintainability.

I-Scan | Java, Machine Learning, Android, Research Project

Developed an Android application for Cataract detection using a lightweight CNN model for Edge devices as part of published research. "**Mobile Detection of Cataracts with an Optimised Lightweight Deep Edge Intelligent Technique**" - [IET Cyber-Physical Systems: Theory & Applications], [2024]

SKILLS

Testing: Quality Assurance, Test Documentation & Design, Requirement Analysis, Manual, Automation, API, TDD, Agile
Tools & Frameworks: Selenium, Postman Cucumber, Aquality Selenium, TestNG, POM, Jenkins, Docker, Jira, Git
Languages: Java, Python, SQL, C, PHP, JavaScript
Soft Skills: Teamwork, Leadership, Research and Analytics, Organizational, Management, Communication
